

Diabetes Research Study

The Cleveland Clinic, Beachwood Family Health Center is testing the difference between two FDA-approved study medications to see if they can lower blood sugar and help keep it controlled for people with Type 2 Diabetes. To qualify for this study, you must be:

- 18 to 75 years old
- Diagnosed with Type 2 Diabetes
- Treating your diabetes with diet and exercise but not taking diabetes medicine
- Willing to participate in the 80-week study

All study-related care, blood sugar monitor supplies, and study medication will be provided at no cost and you may be compensated for your time and travel.

**If interested, please call the Center for Clinical Trials, Cleveland Clinic
at (216) 444-8972.**
